

IFTA Reporting

IFTA Manager offers several reports to aid you in your IFTA reporting utilizing many different options to filter and sort each one. All of our reports offer a print preview with options.

The Detail Trip Audit Reports give you full details of your trips.

The Miles and Gallons Reports help you with your IFTA reporting and fleet management. Miles are pulled from your truck's tracking device and Fuel is imported from your fuel card.

Fuel Purchase Reports provide a wide range of options.

State Tax Reporting gives you a breakdown of the miles driven and fuel purchased in each state to make your IFTA reporting easy. The favorite of many is the NEW Truck and State but we encourage people to look at all of our options and choose their own favorite!

The History reports pull the same as the above reports but use the Purged/history data bases.

Supplier and Truck listings give you several options when you need an easy print out list.

We will cover the trouble shooting reports in a separate video.
